Expertise

Operational Readiness & Support Onboarding

Support-model onboarding, operational readiness reviews, and project-to-production support handovers with documented, repeatable processes.

- Built onboarding playbooks, vendor-selection frameworks, and staffing models for a new India GCC center at Capgemini
- Defined support-model and transition steps so new services enter BAU with clear ownership, SLAs, and escalation paths
- Tracked operational and financial compliance benchmarks across onboarding and steady-state operations

Runbooks, Playbooks & Process Documentation

Authoring, reviewing, and validating operational documentation so support teams can run production services without tribal knowledge.

- Authored onboarding playbooks and knowledge-transfer materials used by PMs and operations teams
- Standardized process documentation aligned with service-management best practices and governance frameworks
- Applied AI-assisted drafting (ChatGPT/Copilot) cutting readiness and status documentation time by 40%

Knowledge Transfer & Team Enablement

Structured KT and coaching so new teams are production-ready before go-live, not after.

- Led KT to 8 project managers on AI-augmented risk identification and mitigation — critical risks down 25%
- Ran new-hire training and quality-process adoption at Wipro BPO (UK insurance operations)
- Created reusable playbooks and checklists enabling repeatable onboarding for future programs

Hypercare, Stabilization & Go-Live Governance

Coordinating the fragile project-to-operations window: handovers, executive communication, and stabilization monitoring.

- Coordinated delivery handovers from build teams to operations with stakeholder alignment at executive level

- Maintained reporting governance and steering-committee updates through transition periods
- Monitored readiness and delivery health metrics, escalating issues before they hit production SLAs

Incident, Problem & Change Management (ITIL)

Hands-on, SLA-driven production support with strong incident and escalation discipline.

- 4+ years SLA-driven production support at Wipro BPO — UK insurance, payment processing, strict service targets
- 95%+ first-contact resolution; escalation management, quality audits, and process improvement
- ITIL-aligned incident, problem, and change disciplines with SLA compliance and governance reporting

Operational Governance & Risk Mitigation

Governance frameworks, escalation paths, and risk control that keep operations stable and compliant.

- Established operational governance frameworks and standardized methodologies for enterprise-scale programs
- Risk identification and mitigation coaching — 25% reduction in critical risks across coached teams
- Financial/operational compliance tracking, automation (30% reduction in aging receivables), and AI-accelerated reporting

Tools & Technologies

Service & Project Tooling

ServiceNow · Jira · MS Project · Primavera · Excel (Advanced) · PowerPoint

AI-Enhanced Operations

ChatGPT / Copilot for runbook and readiness documentation · Asana Intelligence for prioritization · Notion AI for KT notes and action items · predictive forecasting in Excel

GCC & Operations Enablement

Onboarding playbooks · vendor-selection frameworks · staffing models · compliance and financial tracking

Work

Lead PMO — Insurance Client / GCC Scale (Mar 2024 – Present)

Own PMO governance and GCC setup/scaling for a global insurance client: stakeholder management at C-level; cross-functional collaboration (IT security, network, operations, vendors); process architecture and documentation (LLD/playbooks); deliverable review and team coaching (8 PMs); risk/conflict resolution (<48 hrs); invoicing tracking; AI-enhanced forecasting; 100% on-time delivery.
